

The Company

Know more about how our company works

WEBDUTOS

Where we operate

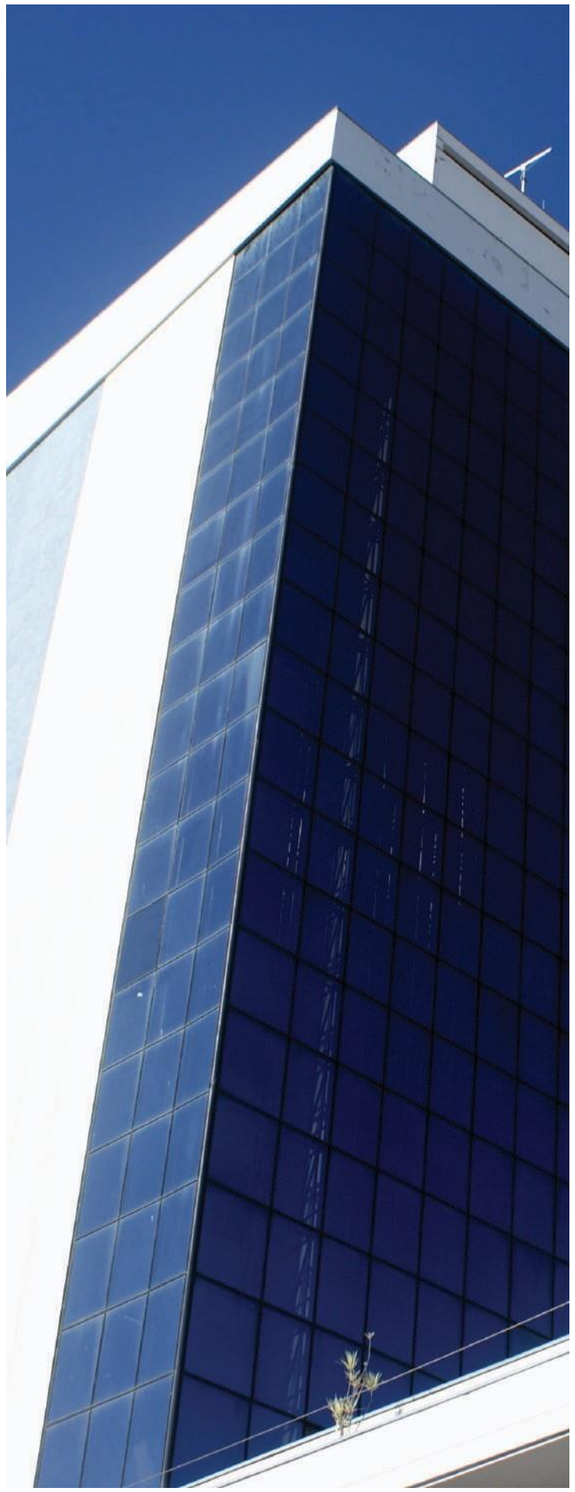

We are present throughout Brazil and in some Latin American countries. We operate in small, medium and large works in all engineering segments. Our technology optimizes processes and changes the way construction monitoring is done.

Fully online solutions to collect, record and trans- form information into monitoring and control indicators. All in real time and through a simple internet browser.

For us, the most important thing is the results that your company can obtain when using our software. That is why we keep a firm commitment to deliver what really matters: Results!

About Us

Webdutos

Specialized in software for engineering companies, with solutions used to support the management of works in various segments, such as pipeline construction, infrastructure, industrial assembly, and civil construction.

Located in the state of São Paulo, in the city of Taubaté (Vale do Paraíba), we have been in the market for 16 years, serving large, medium, and small enterprises.

We provide software for engineering works in Brazil and abroad, dedicated to the management of linear works, industrial assembly, infrastructure, and civil construction.

Software in Spanish, English and Portuguese for works all over Brazil and Latin American countries

Pillars of our work

Webdutos provides modular suite of software for construction management

Adherence to standards

Software adherent to standards such as ISO 9001, API, OHSAS,

IPLOCA, among others.

Modularity

Modular programs that can be purchased at any time during your project.

Ongoing Support

Support channels are available to our customers with no time or subject limitation for questions.

Integrated Information

MS-Excel, Acrobat PDF, Projectwise, Citadon, point ratchet, and weather station.

Fair price

Proposals made in the form of a menu of options: pay only for what you want to hire.

Your Information

The information in the database remains accessible after the work is finished.

Testimonial

"Since we started the partnership, Webdutos has always behaved as a company concerned with offering quality solutions and differentiated support."

Victor Gimenez

Engineering & Innovation Architect, key user of RDOWEB

Types of Works

The platform tracks information from different types of construction sites and issues RDOs digitally.

Civil

Fast and accurate answers obtained through reports generate in real time.

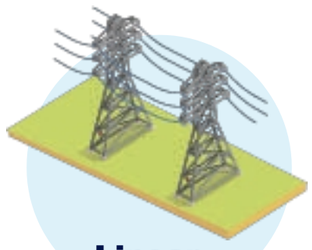

Infrastructure

Objective tracking of field notes throughout the duration of the project.

Industrial

Control of highly complex processes with a large volume of information.

Linear

Propagation of information throughout the work, no matter how long it is.

Management

Data collection and control through standard adherence to norms, without using paper.

Earthmoving

Daily monitoring of climatic factors,facilitating the planning of the work.

Works of all kinds

With RDOWEB you control information from different types of construction sites without the need for paper. The platform has flexible licensing allowing its use in small, medium or large works.

Customers

The best way to get to know us is through those with whom we work.

The degree of satisfaction in the experience of our customers and partners is the best indication of our work.

We know that success is a consequence of this thinking.
